## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 15, 2004 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13-17 and 19-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Motsenbocker 4,420,097.

Motsenbocker teaches a portable liquid dispenser with carrying case and a gel thermal capacitance medium identical to that claimed by applicant.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3727

5. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Motsenbocker 4,420,097 in view of Van Turnhout 6,044,201.

Motsenbocker teaches the claimed invention except that the gel thermal capacitance medium is taught as a cooling medium only and not as a cooling and heating medium. Van Turnhout discloses a container with a gel thermal medium which is disclosed as capable of being heated or cooled. It would have been obvious to one of ordinary skill in the art to replace the gel of Motsenbocker with the gel taught by Van Turnhout since both are directed to gels providing a cooling medium and further to obtain the benefit of the gel being used as a heating medium.

*Response to Arguments*

6. Applicant's arguments with respect to claims 13-22 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*
